

day15\3_forinLoop.js

```
1 // for-in Loop in JavaScript
2 // The for-in loop is used to iterate over the enumerable properties (keys) of an object.
  It gives you each property name (as a string) on every iteration.
3
4 const user = {
5   name: "Sunny",
6   role: "Data Engineer",
7   location: "Melbourne"
8 };
9
10 for (const key in user) {
11   console.log(`${key}: ${user[key]}`);
12 }
```
