

day13\1_shallowCopy.js

```
1 //shallow copy means copy with reference.
2 //shallow copy shares the same address.
3 //only one object is created but all the created references points to the same object.
4 let obj1 = {
5     a:1,
6     b:2
7 }
8
9 let obj2 = obj1;
10 console.log(obj1);
11 console.log(obj2);
12 obj2.a = 31;
13 console.log(obj2); //both obj1 and obj2 references points to the same object or the memory
    location.
14 console.log(obj1);
```
