

day17\1_forOfLoop.js

```
1 //for-of loop on array because the array is iterable
2 const ar = [10, 20, 30, 40, 50];
3 for(let val of ar){
4     console.log(val);
5 }
6
7
8 //for-of loop on string because the string is iterable
9 let str = "good morning!"
10 for(let term of str){
11     console.log(term);
12 }
13
14
15 //never use for-of loop on an object because object is not iterable.
16 // const obj = {
17 //     name: "roy",
18 //     gender: "male"
19 // }
20 //it throws an error.
21 // for(let x of obj){
22 //     console.log(x);
23 // }
24
25
26 //another way to apply for-of loop on an object by converting the object into an array:
27 const obj = {
28     name: "roy",
29     gender: "male"
30 }
31 for(let x of Object.keys(obj))
32 {
33     console.log(x, obj[x]);
34 }
35
36
37 //for-each loop on array for iteration:
38 let arr = [1, 23, 10, 47, 98, 120];
39 arr.forEach((val) => {
40     console.log(val);
41 })
42
43 const fruits = ["apple", "orange", "cherry"];
44 fruits.forEach((fruit) => {
45     console.log(fruit);
46 });
```
