

day17\2_callbackFunction.js

```
1 //passing function as an argument to another function is called as callback function.
2 function fun1(fun2){
3     console.log("hi, I'm function fun1");
4     fun2();
5 }
6
7 function fun2(){
8     console.log("hi, I'm function fun2");
9 }
10
11 fun1(fun2);
12
13
14
15 //another way of callback function:
16 function fun3(fun4){
17     console.log("hi, I'm function fun3");
18     fun4();
19 }
20 fun3(function fun4(){ //here, directly, the function is passed as an argument.
21     console.log("hi, I'm function fun4");
22 });
23
24
25
26 //another way of callback function:
27 function fun5(fun6){
28     console.log("hi, I'm function fun5");
29     fun6();
30 }
31
32 const refVariable = function fun6(){
33     console.log("hi, I'm function fun6");
34 }
35
36 fun5(refVariable); //here, the reference of the function fun6 i.e. refVariable is passed as
a parameter into the function fun5.
37
38
39
40 //another way of callback function
41 function fun7(fun8){
42     console.log("hi, I'm function fun7");
43     fun8();
44 }
45 fun7(()=>{ //here, directly, the arrow function is passed as an argument.
46     console.log("hi, I'm function fun8");
47 });
48
```
