

day17\3_setInterval.js

```
1 //setInterval function
2 /*
3 setTimeout and setInterval are Web APIs, not core parts of the JavaScript language
  itself.While they are written in JavaScript, they are provided by the hosting environment
  (like the browser or Node.js) to handle asynchronous operations.Key DifferencesCore
  JavaScript: Defined by the ECMAScript specification (e.g., arrays, loops, functions).Web
  APIs: Extensions provided by the browser window object (e.g., DOM manipulation, fetch,
  timers).
4 */
5
6 function fun(){
7     console.log("hi!");
8 }
9 setInterval(fun, 5*1000);
```
